

DJ FX Send Preset Catalog

DIH DJ FX Send Pack · version 1.0 · release 2026-10-04

Delivery model

Plugin-specific factory categories plus a single DJ FX Return bank.

Verification status

Factory programs are implemented in the relevant AU/VST3 browsers; audio-return audition and loudness verification remain release QA.

Current boundary

Item	Detail
Available now	Use AU or VST3 plugins through the DJ system's effect send and return path.
Future	DIH Live and direct DJ-software/controller integration are not included.

Routing defaults

Setting	Value
Dry path	authoritative at DJ mixer
Return mix	100% wet
Return fader	0 dB (unity)
Intensity control	DJ mixer send
Max live processors per return	2
Sidechain	detector-only and only when the host exposes a separate key input
Safety	match perceived loudness; check mono/correlation; leave output headroom
